Grade 6 ART Elective

Distance Learning Module 7 & 8: May 18th – May 29th

Visual Arts GRADE 6 ART Elective: Earth Art Sculpture Environments

Targeted Goals from Stage 1: Desired Results

Content Knowledge: Students will make a connection between art, the earth, and nature.

Vocabulary: sculpture, nature, miniature, dwelling, imaginary, landscape design

Skills: Hand-building with various materials

Expectation: Students need to think on the miniature side for this assignment. They will be inventing an <u>imaginary</u> group of people that will live in a specific site that will need to be constructed. This assignment should be created somewhere outside.

Description of Task (s):	Resources and Materials:	Daily Checks (Return to Google Classroom or snapshots from a cell phone)
 Students should first view the websites that I have listed under Resources and Materials. Students will invent an imaginary group of people and will create an environment somewhere outside for this group to live in. These environments will be miniature. Something to think about: Where will I build this environment and how will these imaginary people relate to the setting? Some examples might include in the woods, under or in a tree, in a garden, near an outside building or part of a building, near a 	Charles Simonds- an artist who has been making dwelling places for imaginary civilizations of little people who are migrating through the streets of the cities throughout the world.	 Students can send snapshots of their works in progress. Students can email questions.

Description of Task (s):	Resources and Materials:	Daily Checks (Return to Google Classroom or snapshots from a cell phone)
 pool, on a patio, under a deck. What materials will you use? Do you want this place to stand out or be hidden? Depending on the group of people you invent, will they be compatible to the environment or will they be from a different world? (ex. farmers on farmland or aliens invading farmland). Use your sketchbook to draw out your ideas. Don't forget to give the group of people a name. Once your idea has been developed, then you can start to construct the space for your people. 		
 Have fun either building your props from scratch or using items that you already have. 	Fairy gardens at the Florence Griswold Museum in Old Lyme,CT – wee faerie village artists	
,	Florence Griswold Museum – wee faerie village artists	
	Patrick Dougherty- Earth Artist who works on a much larger scale. He creates his work out of materials from nature. You are working on a miniature scale, but some of these materials are good examples that can still be used. He also had one of his sculptures at the Florence Griswold Museum.	
	Materials: recycled materials (empty bottles, cardboard, empty cans,	

Description of Task (s):	Resources and Materials:	Daily Checks (Return to Google Classroom or snapshots from a cell phone)
	anything made from plastic, scrap fabric etc.) materials from nature (leaves, stones/pebbles, branches, tree bark, flower petals, etc., already existing materials (game pieces, legos, doll furniture, etc.) Additional Materials: glue, tape, string	

Week criteria for success (attach student checklists or rubrics):

Students can submit a rough sketch for feedback before they start on the final project.

Supportive resources and tutorials for the week (plans for re-teaching):
