

Unit E - Linear Systems: Points In Common

Overview

In this unit students will use previously learned skills in graphing equations and extend those to graph systems of equations and graph inequalities and graph systems of inequalities. Students will model using systems of equations or inequalities. Students will also solve systems of equations using substitution or elimination. Students will be encouraged to analyze a system before solving it to determine the most efficient method to use to solve the system.

21st Century Capacities: Synthesizing, Product Creation

Stage 1 - Desired Results

<p>ESTABLISHED GOALS/ STANDARDS</p> <p>MP4 Model with Mathematics MP5 Use appropriate tools strategically MP6 Attend to precision MP7 Look for and make use of structure</p> <p>A.CED.2 Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.</p> <p>A.CED.3 Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or non-viable options in a modeling context.</p> <p>8.EE.8 Analyze and solve pairs of simultaneous linear equations. a. Understand that solutions to a system of two linear equations in two variables</p>	<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <th colspan="2" style="background-color: #D3D3D3; text-align: center; padding: 5px;">Transfer:</th> </tr> <tr> <td colspan="2" style="padding: 5px;"><i>Students will be able to independently use their learning in new situations to...</i></td> </tr> <tr> <td colspan="2" style="padding: 5px;"> <ol style="list-style-type: none"> 1. Demonstrate fluency with math facts, computation and concepts. (synthesizing) 2. Use appropriate strategies to make reaching solutions more efficient, accessible and accurate. 3. Justify reasoning using clear and appropriate mathematical language. (product creation) </td> </tr> <tr> <th colspan="2" style="background-color: #D3D3D3; text-align: center; padding: 5px;">Meaning:</th> </tr> <tr> <td style="width: 50%; padding: 5px; vertical-align: top;"> <p>UNDERSTANDINGS: <i>Students will understand that:</i></p> <ol style="list-style-type: none"> 1.
