

## Unit 1 - Rebuilding the Foundations

### Overview

Many students who take this course have used memorization in previous courses. This method of learning math is not sustainable and has led to frustration and only partial understanding. In this course, students will be encouraged to reach for complete conceptual understanding of every topic, and discouraged from memorizing all but a very few small things like definitions. Learning math this way is more rewarding, enjoyable experience, and students will feel empowered to continue on in mathematics.

The goal of this mini-unit is to rewire student thinking about concepts that are fundamental to Algebra. We will look at the familiar concepts of order of operations, fractions, mathematical properties, operations on polynomials, and graphing from a new perspective that will enable students to transfer their knowledge to more abstract applications in the future. Example: fractions will be taught by prime factorization so that students can transfer their knowledge to the simplification of rational expressions.

**21<sup>st</sup> Century Capacities:** Perseverance, Problem Identification

### Stage 1 - Desired Results

<p>ESTABLISHED GOALS/ STANDARDS</p> <p>MP7 Look for and make use of structure MP8 Look for and express regularity in repeated reasoning</p> <p>CCSS.MATH.CONTENT.HSA.CED.A.2 graph equations on coordinate axes with labels and scales.</p> <p>CCSS.MATH.CONTENT.HSA.SSE.A.1 Interpret expressions that represent a quantity in terms of its context.*</p> <p>CCSS.MATH.CONTENT.HSA.SSE.A.1.A Interpret parts of an expression, such as terms, factors, and coefficients.</p>	<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <th colspan="2" style="background-color: #D3D3D3; text-align: center; padding: 5px;"><i>Transfer:</i></th> </tr> <tr> <td colspan="2" style="padding: 5px;"><i>Students will be able to independently use their learning in new situations to...</i></td> </tr> <tr> <td colspan="2" style="padding: 5px;"> <ol style="list-style-type: none"> <li>1.
